Please settle this case so this economy can get back on its feet. Notice the economy began to falter about the time the DOJ started rumbling about Microsoft's antitrust atrocities. Further notice the economy is gaining steam now that the end is in sight. Continue to delay the outcome, and I think you'll find the economy begin to delay its return to greatness.

However, that is not my only concern. I do not think I ever heard the public complain about this "monopoly"; only competitors. To me, this would indicate Microsoft is a fierce competitor, but not necessarily a monopoly. The hundreds of thousands of people who use MacIntosh computers, Linnux operating systems, Palm operating systems, Unix, etc. don't buy into that "monopoly" game. Microsoft is NOT the only game in town.

Thanks,

Gary yawn
